

Hawthorn Hill

Towel Warmers

The Towel Warmer Collection

Hawthorn Hill towel warmers are the ultimate design statement in any bathroom. All models are made in England from top quality brass, hand polished and plated in a choice of premium finishes.

Hawthorn Hill towel warmers are available with either electrical heating or for connection to a hydronic heating system. Electrically heated models are liquid filled and fitted with a 100w thermostatic heating element which is totally safe to be left on continuously, as the element will switch off to regulate. The element carries a 5 year warranty and can be easily replaced, an important sustainability feature in a towel warmer that will outlast the life of your bathroom.

Hydronically heated standard and radiator models, which connect to a hot water central heating system, can be fitted with the Hawthorn Hill range of modern or traditional valves.

The complete Towel Warmer Collection can be viewed on www.englishtapware.com.au
