## The Collection

---

Designed with both the classical and contemporary setting in mind, the Acquello collection represents the finest in ceramic workmanship.

The Acquello sink is patiently crafted in an unhurried construction process, to achieve its unrivalled quality. Each sink is unique with its own characteristics, reflecting the timeless manner of fireclay production. Robust walls provide exceptional strength and resistance to both impact and thermal shock. Consistency of shape, flat surface along the top edge and focused corners make Acquello sinks a cabinetmaker's dream.

The Acquello collection offers designers a range of sizes and installation options.

### Single Fireclay Butler Sinks:

Produced in two widths - 610mm and 760mm, the Acquello single fireclay sinks serve as ideal wet areas for food preparation, with their versatility highlighted by the generous size and ability to easily accommodate large pans and oven trays.

### Double Fireclay Butler Sinks:

Regarded as the collection's flagship, the Acquello double sink is 1000mm wide. Featuring two large bowls designed for rinsing and washing platters and cookware - a configuration that proves ideal for even the heaviest kitchen duties and the needs of the consummate entertainer. The epitome of design and functionality these sinks make the perfect centrepiece of any kitchen. The recessed partition serves as an overflow for one tub while the other is in use.

*l'arte della terra*

*Inspired by tradition and driven by design,  
Acquello elegantly couples the finest in  
centuries-old Italian craftsmanship with the  
latest in design innovation and technology.*

*Harnessing the perfect balance of water,  
earth & fire, Acquello's elementary vision  
encapsulates the values that define 21st  
century living- superior functionality and an  
unparalleled aesthetic appeal.*

*True Italian masterpieces.*

- Handcrafted in the traditional manner from robust fireclay
- 35mm thick walls for significant appearance and structural strength
- Install with decorative or plain front exposed in the traditional style, or fully enclosed as an under-mounted sink for a sleek, modern look
- Durable stainless steel basket strainer waste and sink protection rack included

Due to the nature of fireclay production, each sink will have its own character. Actual dimensions can vary slightly from those shown. All dimensions +/- 10mm. It is recommended that sinks are supplied to the cabinetmaker for accurate sizing prior to construction of the cabinets.

## MARNANIE - KITCHEN

Charlotte Coote designed this kitchen to be the heart of her family home, a place for breakfast eating, homework doing, cooking and entertaining. Celebrating the home's luscious mountain backdrop, the interior draws inspiration from the English countryside, most evident in the rich green joinery, veined marble benchtop, Acquello 610mm single sink, classic Perrin & Rowe tapware and luxury cup pull cabinet hardware.

SORRENTO HOUSE - KITCHEN

With natural light streaming through, washing up in this picturesque kitchen would be a dream come true with both the perfect view and aged Perrin & Rowe bridge-style tapware over Acquello 760mm fireclay sink.

## MARNANIE - FLOWER ROOM

With an abundance of gorgeous florals on her doorstep, a flower room was an integral addition to Charlotte Coote's family home in Mount Macedon. The luxurious interior provides a calming space for wrangling foliage, with a generously sized Acquello 1000mm double fireclay sink and Perrin & Rowe bridge-style tap with spray rinse, both necessary and practical inclusions.

## Installation

---

Refined for today's kitchen requirements, Acquello fireclay sinks have been designed for a wide range of installation options.

As with all hand finished products, there will be small variations which are part of the character of a genuine fireclay sink. Dimensions may differ slightly and so we recommend your fireclay sink is supplied to your cabinetmaker prior to manufacture of the cabinets.

All waste outlets are supplied with a basket strainer waste.

Waste outlets of 90mm dia. are designed to also accommodate a waste disposal unit fitted with an extended collar.

## Care & Maintenance

---

To ensure longevity of all fireclay sink surfaces, it is recommended that for cleaning simply use a soft cloth and non-abrasive cleaning product.

Acquello 1000mm, 760mm and 610mm fireclay sinks are supplied with custom designed sink protector racks. These protector racks serve the dual purpose of protecting your glassware and plates during washing as well as protecting the bottom of the sink from heavy cookware.

---

BRONTE HOME - LAUNDRY

This laundry confirms that less is more when designing coastal and contemporary interiors. The cleverly devised joinery allows for necessary storage, whilst the addition of handmade Moroccan tiles, delightful pewter Mayan taps by Perrin & Rowe and statement Acquello 610mm fireclay sink inject the space with a layer of luxury – a thoughtful inclusion for those placed on laundry duty.
