THE STORY OF A LIFE WELL CRAFTED™

We believe distinctive stories are what make life exceptional. The discovery of time-honoured craft opens the door to stories unlike any other. Stories of place and provenance. Stories of dedication and passion. Stories of artistry and heritage.

Through Perrin & Rowe, you will find countless stories in every detail. And the closer you look, the more you will see the details of your own story. A story of a life well crafted.

OUR FINISHES

PERRIN & ROWE®
L O N D O N

Like the finest jewellery, Perrin & Rowe tapware has an exacting sense of proportion. We believe the best way to make the best is to bring together the foremost in innovation with time-tested techniques. Crafted in England, Perrin & Rowe designs reinterpret the past with the technology of the present.

Perrin & Rowe allows further customisation of the classical range, offering custom Black, Walnut or matching metal handle inserts in all the signature finishes.

CHROME - CP

A shiny finish with a hint of blue for a classical or contemporary feel.

NICKEL - NI

A shiny finish with a golden glow. If left, nickel will develop an aged patina similar to silverware, with the occasional polish restoring its original gleam.

PEWTER - PF

A brushed nickel finish which is the perfect complement to stainless steel sinks and appliances.

POLISHED BRASS - BR

This is uncoated bare brass with a smooth, polished finish. Brass oxidises over time to gain a characteristic patina.

SATIN BRASS - SB

This is uncoated bare brass brushed for a satin look. Brass oxidises over time to gain a characteristic patina.

GOLD - IG

This finish, which contains real Gold, will give a luxurious look.

KITCHEN COLLECTION

Your kitchen tapware is one of the most important components of your kitchen. Invest in the best.

STYLES

Perrin & Rowe have developed their kitchen tapware collections over decades resulting in an elegant and timeless offering. Available with lever handles or crosshead handles, in Classical, Contemporary and Country styles, we have the perfect kitchen tapware to suit your style of kitchen.

SPRAY RINSE TAPS

Our bench mounted spray rinse taps have an amazing 1.2 metre hose reach, perfect for getting into the corners of farmhouse style butler sinks and rectangular stainless steel sinks. A spray rinse should be specified at the time you purchase your kitchen mixer as it cannot be added to later as it is an integral part of the tap mechanism.

WATER PRESSURE

Our tapware is suitable for low and high water pressure, and meets the highest standards. Refer to the back pages for the finer details and all things technical.

ASSISTANCE WITH CHOOSING KITCHEN TAPWARE

Your kitchen tap is the most utilised piece of equipment in your kitchen so choosing the perfect kitchen tapware is an important decision. Our expert consultants can help you choose the right kitchen tapware for your project. Visit us in store at our designer showrooms in Melbourne and Sydney, or view our collection online and email us your wish-list. We'll be happy to help.

MIMAS TAPS

PERRIN & ROWE®
L O N D O N

AU48463CP -MIMAS - two hole kitchen tap with single lever, round 235mm reach spout & spray rinse in chrome finish

WHY CHOOSE A PERRIN & ROWE KITCHEN TAP?

Perrin & Rowe kitchen tapware reflects a harmony of beautiful design and well-planned functionality which is why they're specified by top designers and architects around the world. Their commitment to performance and durability ensures every kitchen tap is built to last a lifetime.

Our Perrin & Rowe kitchen tapware is manufactured exclusively in the United Kingdom. Perrin & Rowe kitchen taps feature hard-wearing ceramic, quarter-turn valves for a smooth on/off action and are fitted with aerators to promote a softer, splash-free flow of water. Each kitchen tap is precision engineered from high quality brass, hand assembled, and rigorously tested. All kitchen spouts rotate 360°.

POT FILLERS

PERRIN & ROWE®
L O N D O N

A style statement for your kitchen, these exquisite Perrin & Rowe taps show everyone you love your kitchen. Dispensing water directly into pots and preserving-pans whilst on the stove, the arm extends easily over front or rear elements with a convenient reach of 590mm, before seamlessly folding away after use. A cook's dream!

Encompassing a quarter-turn shut off valve at the wall, the pot filler is highly functional and available in all Perrin & Rowe finishes. The porcelain lever is offered in timeless black and white colourways and can be substituted for metal to complement the tap if desired.

Created especially for the Australian market, the Perrin & Rowe pot fillers comply with WaterMark standards. Easily installed with concealed fixings, measure the desired height above your tallest pot on your stove top and direct your plumber to connect to a cold-water supply.

AU43383PF - Pair of Mayan bench mounted bibcock taps in pewter finish

NOT JUST FOR KITCHEN...

PERRIN & ROWE[®]
L O N D O N

The simplicity of a balanced pair of Mayan taps is timeless. The Mayans look stunning in every setting from a modernist interior to Hamptons style beach house. They are outstanding in beauty and function in the kitchen and laundry and fit seamlessly beside the Ionian kitchen tap when used singly as a filtered water tap. In the bathroom, they work perfectly behind a deck mounted vanity basin.

All Perrin & Rowe taps feature excellent quarter-turn German made ceramic disc valves for many years of accurate and effortless use. The Mayans are the ideal design option in kitchens, bathrooms and laundries with unequal water pressure.

Perrin & Rowe taps have a world-wide reputation for original designs which are perfectly balanced in form and function. The hand of the maker is apparent in the attention to detail and finish of each tap which is fully assembled and tested before leaving the Perrin & Rowe factory in England.

WHY PURCHASE PERRIN & ROWE
MADE FOR AUSTRALIA?

The English Tapware Company is the dedicated source of Perrin & Rowe tapware in Australia. The English Tapware Company worked closely with Perrin & Rowe product designers and manufacturing teams in England to obtain Australian WaterMark certifications for the products they need to specially manufacture for Australia.

Whilst the visual appearance of Perrin & Rowe taps sold in other countries does not differ from those made for Australia, they are in fact very different. Taps produced for other countries are not made to Australian plumbing Standards nor WaterMark certified and a registered plumber is not able to legally install them into an Australian home. Local authorities check for WaterMark certification when a project is signed-off and insurance companies may decline a claim when non-WaterMark certified product has been installed.

Purchasing Perrin & Rowe products from The English Tapware Company ensures you receive goods that are compatible with Australian plumbing fittings and regulations and are WaterMark certified and WELS registered so they can be legally installed in Australia.

The English Tapware Company provides a warranty on all Perrin & Rowe tapware, accessories and bathroomware which it imports and sells in Australia. There is no warranty for privately imported product.

DELIVERY TIMES

There is no stock warehouse at the Perrin & Rowe factory in England with every product made to order. The English Tapware Company orders in advance and maintains good stock levels in Australia for the majority of products and finishes. There will be times however, when higher than expected sales or demand for particular items will deplete our warehouse stock. We therefore encourage appropriate forward planning and that you communicate your project requirements at the earliest convenience.

RETURNS

Purchased products will be considered for return by The English Tapware Company for a period of up to

three (3) months after the invoice date. In the event that The English Tapware Company agrees to accept a return, a 20% restocking fee may apply. Any product presented for return and/or credit must be unused and in saleable condition, including its original packaging. The packaging must be unmarked and free from labels. Failure to comply with these conditions may result in the return being declined.

FREIGHT CHARGES

There is no additional freight charge for Perrin & Rowe tapware, stainless steel sinks and accessories deliveries within Australia. Look for our FREE SHIPPING icon on ranges that offer this service. Perrin & Rowe bathroomware deliveries may incur a freight charge per consignment. Please contact The English Tapware Company for further information and costings.

BASIN & SINK WASTES

The English Tapware Company provides durable stainless steel basket strainer wastes for each kitchen sink outlet. Perrin & Rowe basin wastes are sold separately from their basin tap sets as there are several waste options to choose from. Please ensure that you include a suitable Perrin & Rowe waste in your order. A slotted waste will be necessary where the chosen basin has an overflow outlet.

LOW WATER PRESSURES

Perrin & Rowe taps are compatible with most low water pressure installations. To support water conservation regulations, Perrin & Rowe kitchen taps are fitted with a flow controlling spout tip aerator. This limits the water output to 6 to 7.5 L/min to give a WELS Four Star rating. This flow rate is based on taps installed into homes with an incoming pressure of 150 to 500 kPa.

When Perrin & Rowe kitchen taps are installed into homes with low inlet water pressure of less than 150 kPa, we can change the spout tip aerator to a non-flow controlled version to achieve the 6 to 7.5 L/min flow rate.

The single lever shower mixers AU5506, AU5106 and AU5806 require 100 kPa to operate their internal pressure balancing valve.

Kitchen taps with a spray rinse requires a minimum inlet water pressure of 100 kPa to activate their diverter mechanism and a maximum of 500kPa.

HANDLE ALIGNMENT

At Perrin & Rowe every detail counts. Every ceramic disc valve in a Perrin & Rowe product has an acetal handle alignment vernier positioned between the spindle of the valve and the spline of the handle. This vernier allows fine-tuning of the handle position during assembly and installation, for perfect handle orientation.

CONSTRUCTION

Unlike some modern tapware that is made from chrome coloured plastics or aluminium alloys, Perrin & Rowe taps are still made from solid brass. Brass has proven to be the ultimate material for tapware, withstanding years of constant use and temperature variation without cracking or distortion.

CERAMIC DISC VALVES

Superseding conventional tap washers, Perrin & Rowe taps are fitted with German ceramic disc valves, operating with a quarter turn from off to on. All valves and cartridges will provide many years of effortless operation, are easily replaced.

15 YEAR TAPWARE WARRANTY

Perrin & Rowe will, at its option, replace or repair any Perrin & Rowe tapware purchased from The English Tapware Company Limited or indirectly from The English Tapware Company Limited via an authorised Perrin & Rowe dealer in Australia with a manufacturing fault in materials or workmanship in the body for a five (5) year period from the date of purchase. An additional warranty applies for a further ten (10) years during which any warranty claim for a manufacturing fault can be rectified by the supply of replacement product or parts with any labour cost being the responsibility of the customer. This 15-year extended warranty only applies to products purchased after 1 April 2014.

There is a separate warranty for the consumables within the tap and for the finish.

WARRANTY FOR CONSUMABLE COMPONENTS

Ceramic disc cartridges incorporated within Perrin & Rowe tapware are a consumable item and have a parts replacement warranty for five (5) years from the date of original purchase of the tap.

This consumable components warranty provides for the supply of replacement cartridges during this period. Flexible inlet hoses, handshower and kitchen tap spray rinse hoses, O rings and washers, non-return valves, poppet valves and aerator inserts are also consumable components and covered by a five (5) year parts replacement warranty from the date of purchase. This warranty excludes damage caused by misuse, improper installation or vandalism.

WATERMARK CERTIFICATION

Perrin & Rowe manufactures kitchen taps & basin taps, bath taps and showers especially for The English Tapware Company in Australia using either Lead Free or DZR (dezincification resistant) brass of the highest quality and with fittings which are compatible with Australian plumbing. These taps are awarded WaterMark certification under license number WMKA02818. This certification only applies to the Perrin & Rowe tapware which is made for Australia and sold through The English Tapware Company.

PERRIN & ROWE TAPWARE SOLD ELSEWHERE IN THE WORLD IS NOT CERTIFIED FOR AUSTRALIA, CONTAINS DIFFERENT BRASS AND PLUMBING FITTINGS AND CANNOT BE LEGALLY INSTALLED.

WaterMark certification must be shown on a visible part of the product as proof that a manufacturer's tapware design, materials and construction meet the requirements of the Australian tapware Standards. Inspectors will look for this certification mark.

To understand more about the new WaterMark Lead Free certifications read onto the next page.

WELS CERTIFICATION

Perrin & Rowe kitchen and bathroom tapware has been tested and certified with a WELS Four Star rating under the Water Efficiency Labelling & Standards (WELS) scheme with License number 0150. Perrin & Rowe shower fittings outlets have a WELS Three Star rating.

Perrin & Rowe toilets supplied with a matching cistern and pan are fitted with high quality Geberit inlet and flush valves. These are operated with a dual flush push button giving 4 litres average flush, 6 litre full flush and 3 litre half flush. They have a WELS Three Star rating under License no. 0150.

Perrin & Rowe wall mounted and back-to-wall toilets are designed to be coupled to an in-wall cistern and frame such as made by Geberit Sigma8. When connected to the Geberit Sigma8 4.5/3L in-wall cistern, they achieve a 3.3 litre average flush, 4.5 litre full flush and a 3 litre half flush. They have a Four Star WELS rating under License no. 0150.

DOCUMENTATION

For documentation including specification guides, dimensioned drawings, CAD files and product information please visit the specific product page at www.englishtapware.com.au/brands/perrinandrowe. Perrin & Rowe installation guides are included in all product boxes.

WATERMARK LEAD FREE FOR DRINKING WATER TAPS

COMPLIANCE: LEAD FREE, WATERMARK AND WELS

At first glance, the labels on taps or showerheads might seem like an afterthought. But when it comes to your health, wellbeing, and the efficiency of your home, they matter more than you might realise.

WHY THESE LABELS ON YOUR TAPWARE MATTER... MORE THAN YOU MIGHT THINK

At first glance, the labels on taps or showerheads might seem like an afterthought. But when it comes to your health, wellbeing, and the efficiency of your home, they matter more than you might realise.

Certification marks like WaterMark and WELS are more than bureaucratic requirements - they're signs that the tapware in your home has been independently assessed for safety, performance, and sustainability. And in today's homes, those three qualities matter more than ever.

YOUR WELLBEING BEGINS AT THE TAP

Water is one of the most intimate parts of our daily routine. We drink it, cook with it, bathe our children in it - and trust it implicitly.

But that trust depends on the quality of what delivers it: your tapware. Non-compliant, poor-quality, or outdated fittings can introduce risks most people don't see coming. That's why choosing certified fixtures is a vital - and often overlooked - part of creating a healthy home.

At The English Tapware Company, we take this responsibility seriously.

Behind the craftsmanship is a foundation of engineering that supports both your wellbeing and the environment.

WATERMARK: THE SAFETY STANDARD YOU SHOULDN'T IGNORE

The WaterMark Certification Scheme is Australia's baseline for plumbing product safety. It ensures that fittings have been independently tested and certified to meet national performance standards.

If a product doesn't carry this mark, it cannot legally be installed by a licensed plumber - no matter where you buy it. It's your first assurance that what's behind the walls and under the sink is safe, durable, and fit for purpose.

All Perrin & Rowe products comply with the WaterMark scheme (Licence WMKA02818) and relevant Australian standards (AS/NZS 3718:2005 and AS/NZS 3662:2005).

PLANNING AHEAD: A SUBTLE BUT SIGNIFICANT CHANGE

In response to growing health concerns, the National Construction Code (NCC) requires all tapware used for drinking water meets strict low-lead requirements from 1 May 2026, certified under the new Lead-Free WaterMark.

This certification confirms that copper alloy components in kitchen and basin tapware contain no more than 0.25% lead by weighted average across all wetted surfaces, aligning Australian regulations with international best practice.

Historically, tapware sold in Australia - particularly for KITCHEN and BASIN use - has been manufactured using Dezincification-Resistant (DZR) brass, which typically contains between 1.5% and 2.5% lead. These taps have met long-standing WaterMark standards, but the new lead-free requirements take health protection even further.

It's important to note that the new rule only applies to tapware used with drinking water. Products like bath-only taps, showerheads, dishwashers, and emergency fittings remain exempt under current guidelines.

PROACTIVE COMPLIANCE: PERRIN & ROWE IS READY

Perrin & Rowe's UK foundry is already making the 2026 Lead Free transition, having reformulated the brass alloys to meet low-lead thresholds without compromising on quality or finish.

This proactive shift ensures that all kitchen and basin tapware destined for Australian homes will meet the new standards - well ahead of the deadline. Products bearing the Lead-Free WaterMark are clearly marked in this catalogue and noted on our website as LF.

THE IMPLEMENTATION OF LEAD-FREE REQUIREMENTS FOR DRINKING WATER

Living in Australia, we have an expectation that the drinking water flowing from our kitchen and bathroom taps is safe for us and our families to drink. Our plumbing regulations for tapware requires them to be made of DZR (dezincification resistant) brass, the formula for which has a very small lead content. Responding to the global movement for plumbing regulators to reduce lead in brass formulas, changes have been made to the Australian and NZ plumbing and building codes.

REGULATIONS

Following a three-year transitional period to allow manufacturers to comply with the new requirements, all plumbing products coming into contact with drinking water which are installed after 1 May 2026, must comply with the new lead-free requirements.

The scope of these new requirements is comprehensive, encompassing all copper alloy plumbing products that come into contact with drinking water. Products falling within this new requirement include kitchen and basin taps, mixers, plumbing fittings, drinking fountains, water filter systems, ice makers, water heaters, boiling water tanks and taps, and units dispensing chilled and carbonated water.

Significant brands with their own manufacturing facilities have used the three-year transition period to make the necessary changes in production and materials and undergo the testing regime required to certify complying lead-free product in advance of the 1 May 2026 deadline. Some brands will not be able to accommodate the changes and will disappear from the local market after that date.

LEAD-FREE WATERMARK CERTIFICATION DOCUMENTATION

Certified compliance with the new regulations will be evidenced by a new Lead Free WaterMark logo on the product and packaging and listed as Lead Free on their WaterMark Schedule.

When specifiers, interior designers, architects, consumers, tradesmen etc. are selecting plumbing products for future projects, they should request copies of a brand's WaterMark and Lead Free WaterMark certification schedules to ensure the selected product can be legally installed.

Suppliers should host their WaterMark and Lead Free WaterMark schedules on their websites or provide them on request to enable specification of their products. Specifiers should include these WaterMark and Lead Free WaterMark certification schedules within their project documentation.

TRANSITION PERIOD END DATE

Australia: The Australian Building Codes Board (ABCB) give the transition period end date of 1 May 2026 as the date after which only certified lead free product can be installed. They advise that they are preparing a document with more detail covering projects under construction on that date and will place this on the ABCB website.

New Zealand: In New Zealand MBIE have given the following instructions:

Building consent applications and the transition period end date

The information below explains how the transition period end date should be applied.

Consents granted before the transition period ends

For building consents granted by a building consent authority (BCA) on or before 1 May 2026 (including

consented projects under construction), the building work may proceed using the acceptable solution provisions that were approved by the building consent.

Consent applications made before the transition period ends

Building consent applications that have been made on or before 1 May 2026 may continue to comply with the acceptable solution provisions that were in place on the date the consent application was made.

Consent applications made after the transition period ends

Building consent applications made on or after 2 May 2026 must follow the updated provisions when using the acceptable solutions as a means of compliance.

Building work that does not require a consent

For building work exempt from requiring a building consent under Schedule 1 of the Building Act 2004, the person who carries out the work (e.g. the plumber) is responsible for ensuring that the products and methods used in carrying out the work comply with the requirements that are in effect at the time of installation.

FINAL THOUGHT: CHOOSE WITH CONFIDENCE

Tapware isn't just a finishing touch - it's an everyday interface with your health, your home, and your planet.

Look for these three marks:

WaterMark – for safety and compliance

WELS – for water efficiency and savings

Lead-Free WaterMark – for added peace of mind

Because the best design choices are the ones that care for what you can't see - your health, your family, and your future.

PERRIN & ROWE CODING

Since notification of the new lead free requirements, we have been working closely with Perrin & Rowe and Rockwell collections on compliance with them. We have created a new lead free kitchen and bathroom tap collection and have passed the necessary testing. This collection is now in production for Australia and New Zealand and presented in this catalogue.

The products which will be available in Lead Free going forward are tagged accordingly "AVAILABLE IN LF VERSION 2026" and also listed in this catalogue. The new LF code has a 3 as an additional last digital before the finish suffix. ie AU1222CP will become AU12223CP.
