# JOSEPH GILES

## ARCHITECTURAL DOOR + CABINET HARDWARE

Luxury architectural hardware specialists Joseph Giles are an exceptional British business with an impressive portfolio of residential and commercial projects across the globe.

Their core ranges are designed and manufactured in Great Britain, and are the result of a history of innovation combined with decades of experience. They are proud of their British heritage and work with the finest craftsmen across the UK to deliver exceptional products for their customers.

Since 1998 they have built a reputation as one of the finest designers and manufacturers of bespoke door hardware in the UK. Their professionalism and attention to detail secured them significant contracts for the Royal Family, celebrities and many other exclusive projects.

Their strong focus on creating exceptional products has earned them the reputation as being a 'world leader in luxury architectural hardware' and an international business award.

### *Specification*

Joseph Giles in conjunction with The English Tapware Company are introducing Australia to the finest quality door, window and cabinet hardware. The English Tapware Company team offer consultation based specification for Joseph Giles' comprehensive range of elite English crafted hardware. Firstly, The English Tapware Company can offer indicative pricing, followed by a consultation based quotation service and full project scheduling.

### *Our Collections*

This catalogue showcases The English Tapware Company's core ranges which Joseph Giles hold stock of unfinished items in the UK, and have priced for us in advance. We have shorter lead times on this product.

### *Delivery*

Please check on the lead times of Joseph Giles and plan ahead for your project requirements. Availability will vary according to demand so allow a production and air-freight delivery time from England of approximately 8-12 weeks.

### *Made to Order*

All other items you find on the Joseph Giles UK website are available through The English Tapware Company, however you will need to specify exact quantities and we will quote these. The prices listed are rough indicative guides only and will require re-quoting for your project. These items are Made to Order specifically for your project, thereby the price and lead times will reflect this bespoke service.

**ASHWORTH**

The 'Ashworth' collection pays homage to the form and function of the Bauhaus movement.

Its founder, Walter Gropius, designed a lever handle in the 1920s which epitomises Bauhaus principles, and remains a popular choice in design schemes today.

**ASHWORTH KNURLED**

The 'Ashworth Knurled' collection is inspired by the tools of yesteryear used in traditional crafting methods.

Beautiful diamond knurling echoes the patterns found on the handles and grips of humble instruments like the pocket scriber, punch and vice.

**BARTLETT**

Circles have played an important part in architecture across many different buildings, and in many different forms. Whether it be a domed roof, circular window, ceiling rose, or an arched doorway, the list goes on.

With the 'Bartlett' range, we've sought to subtly harness the beauty of simple concentric circles in a contemporary way.

**DARLINGTON**

The 'Darlington' collection is a perfect example of translating the classical details of Corinthian columns onto door hardware.

**HUNTINGFORD**

This collection was inspired by the shape and elegance of fine menswear, such as cufflinks. Since Joseph Giles prides itself on creating small, but important details, the idea of cufflinks, a miniature but important feature in a harmonious and luxury outfit, fits perfectly within this ideology.

Polished, presentable and classic; this is a beautiful accessory for any luxury design scheme.

**MARBLE**

Joseph Giles have selected only the finest marbles, including White Onyx, Green Guatemala, Red Laguna and Black and Gold Portoro, which provide jewel-like finishing touches for the ultimate in luxury design schemes. All materials are sustainably and ethically sourced.

Marble is a natural material so natural variations will occur. All marble images are indicative only.

**MONTGOMERY**

The 'Montgomery' collection was born from the appreciation of the original Walter Gropius handle; a design Joseph Giles have always admired for its simple and solid grip.

**MONTGOMERY KNURLED**

The 'Montgomery Knurled' collection is inspired by the tools of yesteryear used in traditional crafting methods.

Beautiful diamond knurling echoes the patterns found on the handles and grips of humble instruments like the pocket scriber, punch and vice.

## FONTEYN

The slender form of the 'Fonteyn' follows the uniquely distinctive lines of a handle designed by Italian architect Gio Ponti. As beautiful as the original handle was, the size did not suit many of the modern-day door proportions.

The delicate form and perfect balance are synonymous with that of a ballerina, hence this design is fittingly named after Margot Fonteyn.

## HAMMERED

The Joseph Giles Hammered texture is inspired by the sculptured shapes that the waves create on objects like driftwood, stones and sand.

It is produced using traditional blacksmithery methods. The process cannot be hurried, and particular attention has to be paid to the pressure applied.

## MONTGOMERY LINEAR

The 'Montgomery Linear' collection introduces a new modern and clean texture in the linear knurl.

The lined texture complements the sleek, modern appearance and offers a tactile yet soft feel in the hand whilst operating.

## WEDGE

Inspired by the slender forms of car aerodynamics, the 'Wedge' pays homage to the classic angular lines of the Ferrari Dino 308 GT4.

**POLISHED CHROME**

SUFFIX: PC

BASE MATERIAL: Brass

FINISH TYPE: Plated

**DESCRIPTION:** This is a bright mirror finish chrome plate on nickelled solid brass. This finish is extremely hard wearing and is suitable for most environments. It has a cool tone and is a perfect match for modern design schemes, and is a popular choice for kitchens and bathrooms. The metal undergoes a range of processes to achieve the finished look which includes pre-polishing, hot soaking, electrolytic cleaning, plating and polishing.

**OVER TIME:** This is non-tarnishing and with the correct maintenance will retain its high mirror finish.

**APPLICATION:** This is suitable for both internal and external usage, however, is not suitable for highly chlorinated areas such as swimming pools.

**CARE & MAINTENANCE:** Clean with soft lint free cloth and warm soapy water. To maintain its shine, a chrome polish can also be used.

**POLISHED NICKEL**

SUFFIX: PN

BASE MATERIAL: Brass

FINISH TYPE: Plated

**DESCRIPTION:** This is a bright mirror finish nickel plate on polished brass; it has a warm tone that will naturally age. The metal undergoes a range of processes by skilled artisans to achieve the finished look which includes pre-polishing, hot soaking, electrolytic cleaning, plating and polishing.

**OVER TIME:** The product will age to a natural patina, darkening and dulling to develop its own individual character.

**APPLICATION:** This is suitable for both internal and external usage, however, is not suitable for highly chlorinated areas such as swimming pools. Where we don't recommend it is used: External use and highly chlorinated areas such as swimming pools.

**CARE & MAINTENANCE:** Clean with a soft lint-free cloth and warm soapy water. Can either be left to develop its own natural patina, or to maintain the original finish clean with a high-quality metal polish.

**BRUSHED NICKEL**

SUFFIX: BN

BASE MATERIAL: Brass

FINISH TYPE: Plated

**DESCRIPTION:** This is a brushed nickel-plated finish on brushed brass. This finish has a warm tone that will naturally age and develop a unique beauty. Products in this finish undergo a range of processes by skilled artisans to achieve the finished look which includes pre-polishing, hot soaking, electrolytic cleaning, plating and polishing.

**OVER TIME:** The product will age to a natural patina, darkening and dulling to develop its own individual character.

**APPLICATION:** We recommend that this finish is used in internal areas, avoiding highly chlorinated environments such as swimming pool areas. This finish can be used externally, although will patinate faster, and will need regular maintenance.

**CARE & MAINTENANCE:** For standard cleaning, use a soft lint-free cloth and warm soapy water.

**POLISHED BRASS WAXED**

SUFFIX: PBW

BASE MATERIAL: Brass

FINISH TYPE: Solid

**DESCRIPTION:** A mirror finish solid brass surface, with a thin coating of clear beeswax for protection. The metal undergoes a lengthy hand polishing process to achieve this finish.

**OVER TIME:** This will begin as a bright highly polished finish. Over time, it will naturally patinate, darkening and dulling to develop its own individual character.

**APPLICATION:** We recommend that this finish is used in internal areas. It can be used externally, although will patinate faster, and will need regular maintenance.

**CARE & MAINTENANCE:** If your preference is to allow the piece to develop its own character, simply clean with a soft lint-free cloth and warm soapy water. If you want to preserve the original finish, clean with a good quality brass polish, and follow with a light application of beeswax. Take a look at Joseph Giles' short clip on how to use beeswax polish on their products: <https://vimeo.com/258045098>

**BRUSHED BRASS WAXED**

SUFFIX: BBW

BASE MATERIAL: Brass

FINISH TYPE: Solid

**DESCRIPTION:** A brushed finish on solid brass, with a thin coating of clear beeswax for protection. The metal undergoes a lengthy finishing process to achieve this look.

**OVER TIME:** This will begin as a light brushed finish. Over time, it will naturally patinate, darkening and dulling to develop its own individual character. This is a natural process; however, the rate of patination can be slowed by maintaining a light application of good quality beeswax.

**APPLICATION:** We recommend that this finish is used in internal areas, avoiding highly chlorinated environments such as swimming pool areas. This finish can be used externally, although will patinate faster, and will need regular maintenance.

**CARE & MAINTENANCE:** For standard cleaning, use a soft lint-free cloth and warm soapy water. We also recommend a regular light application of beeswax. Take a look at Joseph Giles' short clip on how to use beeswax polish on their products: <https://vimeo.com/258045098>

**MID ANTIQUE BRASS  
WAXED**

SUFFIX: MABW

BASE MATERIAL: Brass

FINISH TYPE: Living

**DESCRIPTION:** This brushed brass has a hand applied antique effect treatment which is then finished with beeswax. To achieve this, the craftsmen apply a chemical treatment which adds a colourant. This process is undertaken several times to achieve the required depth of colour. The piece is hand polished and worked back to the metal to achieve an aged antique look, which is then sealed with wax.

**OVER TIME:** This product will age to a natural patina, darkening and dulling to develop its own individual character.

**APPLICATION:** We recommend that this finish is used in internal areas, avoiding highly chlorinated environments such as swimming pool areas. This finish can be used in sheltered external areas, although will patinate faster, and will need regular maintenance.

**CARE & MAINTENANCE:** Wipe clean with soft lint free cloth. This finish is not compatible with chemical-based cleaners, soaps or abrasive materials. We recommend after cleaning, a coating of good quality beeswax is applied. Take a look at Joseph Giles' short clip on how to use beeswax polish on their products: <https://vimeo.com/258045098>

**DARK BRONZE WAXED**

SUFFIX: DBZW

BASE MATERIAL: Brass

FINISH TYPE: Living

**DESCRIPTION:** This is brushed brass, with a hand applied dark antique effect treatment which is then finished with a wax coating. The processes involved in creating this finish take considerable time and effort. A chemical is applied, worked into the brass and then extensively polished. The process is repeated several times to develop layers of dark bronze tint until the depth of dark bronze is achieved. It is finished with a light coating of beeswax.

**OVER TIME:** This finish is as dark as it will ever be, however, will subtly change over time during the cycles of wear and patination. In areas where the piece is frequently used, the finish will appear more like mid antique brass waxed until the natural patination gradually makes the piece darker and so on and so forth.

**APPLICATION:** We recommend that this finish is used in internal areas, avoiding highly chlorinated environments such as swimming pool areas. This finish can be used in sheltered external areas, although will patinate faster, and will need regular maintenance.

**CARE & MAINTENANCE:** Wipe clean with soft lint-free cloth. This finish is not compatible with chemical-based cleaners, soaps or abrasive materials. We recommend after cleaning; a coating of good quality beeswax is applied. Take a look at Joseph Giles' short clip on how to use beeswax polish on their products: <https://vimeo.com/258045098>

**Please note this is a reference guide only. As almost all Joseph Giles products are finished by hand, natural variations will occur and will add a unique beauty to each piece.**

**BLACK & GOLD PORTORO**

SUFFIX: BP

BASE MATERIAL: Stone

FINISH TYPE: Polished

DESCRIPTION: The Black and Gold Portoro is a stunning example of marble, the deep black is peppered with rich gold veining throughout. This beautiful stone has been used since the roman times for decorative purposes from ornaments through to vast columns. As a natural product there will be variations in the veining patterns which we believe adds to its charm.

APPLICATION: Black and gold Portoro marble can be used externally, internally and in wet and highly chlorinated areas.

CARE & MAINTENANCE: Clean with soft lint free cloth and warm soapy water.

**WHITE ONYX**

SUFFIX: WO

BASE MATERIAL: Stone

FINISH TYPE: Polished

DESCRIPTION: White Onyx is a stunning and delicate material which has varying levels of opaqueness throughout and rippled with yellow gold veins. Quarried in Mexico, White Onyx is widely considered as one of the world's most luxurious materials and has been used for decorative purposes since antiquity. As a natural product there will be variations in the veining patterns which we believe adds to its charm.

APPLICATION: Onyx marble can be used externally, internally and in wet and highly chlorinated areas.

CARE & MAINTENANCE: Clean with soft lint free cloth and warm soapy water.

**GREEN GUATEMALA**

SUFFIX: GG

BASE MATERIAL: Stone

FINISH TYPE: Polished

DESCRIPTION: The Green Guatemala marble is a serpentine deep green stone which is veined with varying shades of whites and darker greens. While the name pays tribute to Guatemala and its lush rainforests, the material is quarried in India. It has long been thought by indigenous tribes that this marble has healing powers, and over the years, has been used in some of the finest buildings and hotels around the world. As a natural product there will be variations in the veining patterns which we believe adds to its charm.

APPLICATION: Green guatemala can be used externally, internally and in wet and highly chlorinated areas.

CARE & MAINTENANCE: Clean with soft lint free cloth and warm soapy water.

**RED LAGUNA**

SUFFIX: RL

BASE MATERIAL: Stone

FINISH TYPE: Polished

DESCRIPTION: The Red Laguna marble is quarried in Turkey and offers a deep cherry red marble offering to the collection. It is peppered with its rich flecks and veining and is a wonderful addition to a design scheme. As a natural product there will be variations in the veining patterns which we believe adds to its charm.

APPLICATION: Red Laguna marble can be used externally, internally and in wet and highly chlorinated areas.

CARE & MAINTENANCE: Clean with soft lint free cloth and warm soapy water.

OLB  
Organo Light Bronze

**ORGANO LIGHT BRONZE**

SUFFIX: OLB

BASE MATERIAL: Bronze

FINISH TYPE: Light Antiqued

The Organo range is manufactured using traditional casting methods. As each piece is unique, there will be minor aesthetic variations and differences in porosity.

ODB  
Organo Dark Bronze

**ORGANO DARK BRONZE**

SUFFIX: ODB

BASE MATERIAL: Bronze

FINISH TYPE: Dark Antiqued

The Organo range is manufactured using traditional casting methods. As each piece is unique, there will be minor aesthetic variations and differences in porosity.

OOG  
Organo Old Green

**ORGANO OLD GREEN**

SUFFIX: OOG

BASE MATERIAL: Bronze

FINISH TYPE: Patinated

The Organo range is manufactured using traditional casting methods. As each piece is unique, there will be minor aesthetic variations and differences in porosity.

OOS  
Organo Old Silver

**ORGANO OLD SILVER**

SUFFIX: OOS

BASE MATERIAL: Bronze

FINISH TYPE: Silvered

The Organo range is manufactured using traditional casting methods. As each piece is unique, there will be minor aesthetic variations and differences in porosity.

**POLISHED STAINLESS STEEL**

SUFFIX: PSS

BASE MATERIAL: Stainless steel

FINISH TYPE: Solid

DESCRIPTION: A solid natural stainless steel product with a mirror polished surface.

OVER TIME: This is non-tarnishing and with the correct maintenance will retain its high mirror finish.

APPLICATION: This finish is used both internally and externally, and is ideal for swimming pools and wet rooms. It is very hard-wearing and corrosion-resistant.

CARE & MAINTENANCE: Clean with a soft lint-free cloth and warm soapy water. To maintain its shine, a good quality stainless steel cleaner can also be used.

**SATIN STAINLESS STEEL**

SUFFIX: SSS

BASE MATERIAL: Stainless steel

FINISH TYPE: Solid

DESCRIPTION: A solid stainless steel product with a brushed satin surface.

OVER TIME: A non-tarnishing finish, although the brushed surface will inevitably collect minor deposits with use.

APPLICATION: This finish is used both internally and externally, however, recommend avoiding highly chlorinated environments such as swimming pool areas. This finish will require regular maintenance if used externally.

CARE & MAINTENANCE: Clean with a soft lint-free cloth and warm soapy water.

**BRUSHED MIDNIGHT BLACK**

SUFFIX: BMB

BASE MATERIAL: Brass

FINISH TYPE: Plated

DESCRIPTION: This is a brushed black chrome plated finish that is hard wearing and is suitable for most environments. It has a cool tone and is a perfect match for modern design schemes, and is a popular choice for kitchens and bathrooms. The metal undergoes a range of processes to achieve the finished look which includes pre-polishing, hot soaking, electrolytic cleaning, plating and polishing.

OVER TIME: This is non-tarnishing and with the correct maintenance will retain its colour and brushed finish.

APPLICATION: This is suitable for both internal and external usage, however, is not suitable for highly chlorinated areas such as swimming pools.

MAINTENANCE: Clean with soft lint-free cloth and warm soapy water. To maintain its appearance a chrome polish can also be used.

NOTE: PLEASE CHECK THE JOSEPH GILES WEBSITE AS NOT ALL ITEMS AVAILABLE IN BMB.

**POLISHED MIDNIGHT BLACK**

SUFFIX: PMB

BASE MATERIAL: Brass

FINISH TYPE: Plated

DESCRIPTION: This is a polished black chrome plated finish that is hard wearing and is suitable for most environments. It has a cool tone and is a perfect match for modern design schemes, and is a popular choice for kitchens and bathrooms. The metal undergoes a range of processes to achieve the finished look which includes pre-polishing, hot soaking, electrolytic cleaning, plating and polishing.

OVER TIME: This is non-tarnishing and with the correct maintenance will retain its colour and high mirror finish.

APPLICATION: This is suitable for both internal and external usage, however, is not suitable for highly chlorinated areas such as swimming pools.

MAINTENANCE: Clean with soft lint-free cloth and warm soapy water. To maintain its shine, a chrome polish can also be used.

## MORTICE LATCH - INTERNAL PASSAGE DOORS

The Joseph Giles "Orange" latches and locks are the absolute essence of top-quality British engineering with every component engineered from the highest quality brass and steel. They are carefully hand-assembled to ensure the inner workings dovetail perfectly together to provide seamless operation and a latch that will last a lifetime.

This mortice latch is recessed into the edge of the door and the latch-bolt is operated by pair of knobs or lever handles. These latches are used on non-locking doors.

These latches are available in three spring strengths:

LA1155 (L) - LIGHT SPRUNG for door knobs

LA1155 (M) - MEDIUM SPRUNG for LV1005, LV1045, LV1123, LV1124, LV1126, LV1198 levers

LA1155 (H) - HEAVY SPRUNG for other levers

Use these LA1155 mortice latches with JOSEPH GILES door knobs (DK series) and lever handles (LV series).

With the lockcase fitted centrally within the door thickness, the minimum recommended door thickness is 35mm.

### FROM THE COLLECTIONS

PAIR OF DOOR  
LEVERS

With this configuration you will need to specify which door lever or knob you require a pair of from the collections.

or

PAIR OF DOOR  
KNOBS

Our staff will calculate the correct spring strength (light, medium or heavy) to ensure optimum operation of your door levers or knobs.

### MORTICE LATCH

**TUBULAR LATCH - INTERNAL PASSAGE DOORS**

This tubular latch is recessed into the edge of the door and the latch-bolt is operated by a pair of knobs or lever handles. This latch is used for non-locking doors and may be paired with the LA1017 tubular bolt to create a bathroom door privacy set.

These latches are available in three spring strengths:

LA1161 (L) - LIGHT SPRUNG for door knobs

LA1161 (M) - MEDIUM SPRUNG for LV1005, LV1045, LV1123, LV1124, LV1126, LV1198 levers

LA1161 (H) - HEAVY SPRUNG for other levers

Use these LA1161 tubular latches with JOSEPH GILES door knobs (DK series) and lever handles (LV series).

With the lockcase fitted centrally within the door thickness, the minimum recommended door thickness is 35mm.

UPGRADE TUBULAR LATCH PASSAGE DOOR TO A PRIVACY DOOR

PRIVACY DEADBOLT - INTERNAL PRIVACY DOORS

This tubular privacy lock is recessed into the edge of the door and the deadbolt is operated by a privacy thumb-turn from the inside and an emergency release on the outside. This lock may be paired with the LA1161 tubular latch to create a bathroom door privacy set. Joseph Giles thumb turn and coin release sets are on 5mm spindles, and this lock has 8mm square spindle hole, so installer will need to use Spindle sleeve adapter 5-8mm included in the box). With the lockcase fitted centrally within the door thickness, the minimum recommended door thickness is 35mm.

Use these LA1017 tubular privacy locks with the JOSEPH GILES thumb turns (TT1 series) and coin releases (RL1 series).

FROM THE COLLECTIONS

THUMB TURN

With this configuration you will need to specify which thumb turn you require from the collections.

Our staff will include the spindle sleeve 5-8mm adapter in the box.

COIN RELEASE

With this configuration you will need to specify which coin release you require from the collections.

Our staff will include the spindle sleeve 5-8mm adapter in the box.

PRIVACY DEADBOLT - INTERNAL PRIVACY DOORS

This privacy deadbolt is recessed into the door. It is operated by a privacy snib from the inside and emergency release from the outside. These locks are usually installed on doors that lead into a cloakroom, bathroom or WC. Any Joseph Giles privacy thumb turn and emergency coin release will be compatible with the 5mm square spindle hole in this deadbolt.

With the lockcase fitted centrally within the door thickness, the minimum recommended door thickness is 35mm, and there is no recommended maximum.

**MORTICE LOCK WITH PRIVACY LATCH**

The Joseph Giles “Orange” latches and locks are the absolute essence of top-quality British engineering with every component engineered from the highest quality brass and steel. They are carefully hand-assembled to ensure the inner workings dovetail perfectly together to provide seamless operation and a latch that will last a lifetime.

This mortice latch with privacy is recessed into the edge of the door. The latch-bolt is operated by pair of knobs or lever handles and the privacy-bolt is operated by a privacy thumb-turn from the inside and an emergency release on the outside.

These latches are available in three spring strengths:

LA1156 (L) - LIGHT SPRUNG for door knobs

LA1156 (M) - MEDIUM SPRUNG for LV1005, LV1045, LV1123, LV1124, LV1126, LV1198 levers

LA1156 (H) - HEAVY SPRUNG for other levers

Use these LA1156 latches with JOSEPH GILES door knobs (DK series) and lever handles (LV series) and for the privacy use JOSEPH GILES thumb turns (TT1 series) and coin releases (RL1 series).

With the lockcase fitted centrally within the door thickness, the minimum recommended door thickness is 35mm.

**FROM THE COLLECTIONS**

	PAIR OF DOOR LEVERS or PAIR OF DOOR KNOBS	With this configuration you will need to specify which door lever or knob you require a pair of from the collections.  Our staff will calculate the correct spring strength (light, medium or heavy) to ensure optimum operation of your door levers or knobs.						
	THUMB TURN	With this configuration you will need to specify which thumb turn you require from the collections.						
	COIN RELEASE	With this configuration you will need to specify which coin release you require from the collections.						

**MORTICE LATCH & LOCK**

	LA1156.01	Mortice latch with privacy for internal door. 60mm backset for handle and 78mm centres. Case size 165h x 90d x 15mm. Forend 24 x 235mm and strike 24 x 235mm. Supplied with metal dustbox.	\$175	\$195				
	LA1156.02	Mortice latch with privacy for internal door. 80mm backset for handle and 78mm centres. Case size 165h x 110d x 15mm. Forend 24 x 235mm and strike 24 x 235mm. Supplied with metal dustbox.	\$235	\$260

## SLIDING DOOR - PRIVACY LOCKS

This sliding door lock is recessed into the door and the dead-bolt is operated by a privacy thumb-turn from the inside and emergency release from the outside. These locks are usually installed on doors that lead into a powder-room, bathroom or WC. Any Joseph Giles privacy thumb turn and emergency coin release will be compatible with the 5mm square spindle hole in this lock.

When installing these locks, please ensure that the cut-out in the frame for the bolt is wide enough to house the splayed-out dead-bolt. It is essential that these locks and the associated recessed fittings are fitted with a high degree of precision.

PLEASE NOTE: Minimum door thickness when used with JOSEPH GILES recessed privacy flush pull sets is 44mm

### NIGHT LATCH FOR EURO CYLINDER - ENTRANCE DOORS

“Night-latches” are fitted into the front door with no lever or knob needed on the outside. From the outside the latch-bolt is opened by a key in the Euro cylinder and from the inside it can be opened by turning a thumb-turn in the other end of the cylinder. The door can also be opened by a lever handle on the inside of the door instead of the thumb-turn. Euro cylinders are not supplied with Joseph Giles locks and need to be specified or procured separately.

These latches are available in three spring strengths:

LA1157 (L) - LIGHT SPRUNG for door knobs

LA1157 (M) - MEDIUM SPRUNG for LV1005, LV1045, LV1123, LV1124, LV1126, LV1198 levers

LA1157 (H) - HEAVY SPRUNG for other levers

With the lockcase fitted centrally within the door thickness, the minimum recommended door thickness is 35mm.

### FROM THE COLLECTIONS

	DOOR LEVER	With this configuration you will need to specify ONE door lever or knob from the collections for the INSIDE of your door only.  Our staff will calculate the correct spring strength (light, medium or heavy) to ensure optimum operation of your door levers or knobs.						
	or DOOR KNOB							

	ESCUTCHEON x 2	With this configuration you will need an escutcheon on BOTH sides of the door to trim your key cylinder
